GREAT ENGINEERING TOWARDS PERFECTION

GREAT LEARNING TOWARDS VERITAS

I . Introduction

Harbin Engineering University (HEU), founded in 1953, is among the first institutions designated under China’s “Project 211” for key national universities. With approval from the Ministry of Education, HEU established a graduate school and is a university in China’s National Priority Discipline Innovation Platform Project. It is also among the initial universities selected for the “Excellent-Engineers Education Training Program” and is a “Double First-Class” initiative institution.

HEU’s academic offerings focus primarily on science and engineering, with balanced growth in engineering, sciences, management, and humanities. Among its disciplines, Shipbuilding and Ocean Engineering ranks TOP 1, Nuclear Science and Technology ranks TOP 3, and Control Science and Engineering ranks TOP 6 in China. The university is committed to high-level international cooperation, conducting extensive academic research, educational collaboration, and cultural exchanges worldwide. By integrating quality educational resources from home and abroad, HEU continuously enhances its global influence and competitiveness. Currently, the university has over 1,100 international students from 90 countries.
